

AGA™

Redefining Convenience in Cast Iron Cooking

The New Electric AGA delivers the same iconic design and cast iron cooking experience but with enhanced control and efficiency. With independently controlled ovens and hotplates, it offers greater flexibility without compromising on performance. It offers the same gentle, radiant heat that's kind to food—now with the convenience of modern technology.

New Electric AGAs – Cost Saving & Simplified Operation

- **No Annual Servicing** Designed for long-term reliability, eliminating the need for costly, time-consuming maintenance.
- **Flexible Placement** No flue required, allowing installation anywhere in the kitchen
- **Simplified Installation** No need for a concrete plinth, reducing preparation work
- **Ready to Use** Delivered as a complete appliance, ensuring a straightforward installation process
- **Full Digital Control** Precision at your fingertips with independent settings for ovens and hotplates.
- **Independent Oven Flexibility** Use each oven separately, optimizing energy use and cooking efficiency.

- **Faster Heat-Up Times** Cast iron ovens and hobs reach the perfect temperature quickly, reducing waiting time.
- **Consistent Oven Performance** Cooking on the hob with hotplates up does not affect oven heat output.

AGA food tastes better because an AGA cooks better, using gentle heat to retain the food's flavour, texture and goodness. The heat radiates from the inner surfaces of the ovens, creating dedicated cooking zones.

NEW ELECTRIC AGAs

CLASSIC AGA

ELECTRIC AGA

Flexibility of a Modern Cooker

The latest electric AGA models offer greater control. The R3 & R7 Series are designed to stay on continuously, while the eR3, eR7, eR7i and ERA models can be turned on and off as needed.

BENEFIT: Lower running costs through improved energy efficiency and controllability.

FEATURES

Induction hobs operate independently of the ovens, heat up faster, and **do not require the oven to be on.**

BENEFIT: Faster heat up times for more efficient cooking with greater flexibility.

Combination Cast Iron and Conventional Ovens (R3 & eR3)

- Electric grill (R3)
- Controllable Independent Ovens (7 Series)
- Conserve Energy overnight or away reducing costs (eR7/eR7i programmer)

Additional Oven Features eR7 / eR7i

Roasting Oven Five pre-set cook settings R9, R8, R7, R6 & B4 which provide flexibility to vary the oven temperature from very hot to moderate. This oven can therefore operate as a second baking oven. The R9 setting is ideal for fast grilling.

Baking Oven Four pre-set cook settings B4, B3, B2 and B1 which gives the flexibility to vary the oven temperature from moderate to cool. This oven can therefore operate as a second simmering oven.

*Available in sizes 60cm to 210cm
