

Welcome to Novy

For over 50 years, Novy has approached each project with the same goal: to combine quality, craftsmanship and design with the finest materials and expertise to bring silence to your kitchen. Creating enduringly beautiful appliances that perform day after day, year after year, all Novy products are supplied with a 2+3 years parts and labour warranty.

Enhanced by the trend for open plan living, extraction and surface cooking itself has become a defining feature of the modern kitchen. Novy provides subtle, elegant and high design statement products that always complement the architectural character of the space. We believe a beautifully designed and crafted kitchen is a statement of quality and there is no better way to make a lasting impression than with Novy. Novy is for every kitchen where performance matters, whether your home is a rural retreat or modern city sleek.

5
YEARS
WARRANTY

5 years warranty

2 year manufacturer warranty and extra 3 year warranty after registerion on www.novy.com/service/information/register-your-device. This covers all the costs of any repair (parts, call out fees and labour) on Novy cooker hoods, worktop extractors, induction hobs, gas burners and design lighting. You do not need to sign a maintenance agreement or contract for this, all you have to do is register.

* The warranty period begins on the date of purchase (billing date). If no invoice can be presented, the date of production shall apply. You can find the full terms and conditions on www.novy.com

INFO

Welcome to the world of Novy

With a rich history and more than 110 years on the clock, Novy has since become a leading brand specialising in high-quality cooker hoods hobs and designer lighting for kitchens and living rooms.

NOVY

When 'good' is simply not enough and only 'the best' will do, Novy brings you advanced, whisper-quiet and efficient worktop extractors and fume hoods. Years of craftsmanship and persistent innovation are our absolute driving forces. From the beginning, the highest standards were set in terms of design, ease of use, durability and, of course, silence. We also offer an exclusive collection of designer lighting, equipped with pioneering and award-winning control technology and perfectly matched to our innovative worktop extractor.

Novy products exude quality and contemporary minimalism and are still developed and manufactured with extreme precision and according to strict quality standards at our facility in West Flanders, Belgium. Today, our products still stand for quality, craftsmanship and innovation. Several products have already won international awards such as Red Dot Award, iF Design Award, Kitchen Design Award, etc.

We are also proud to be part of the Middleby family. In addition to leading brands such as AGA, La Cornue, Rangemaster and Viking, Novy now also belongs to Middleby Residential, a division of The Middleby Corporation.

Middleby Residential

Middleby Corporation, a world leader in foodservice equipment, through its various brands and strategic acquisitions, has an extensive portfolio that includes not only residential kitchen equipment, but also commercial and industrial equipment for food preparation, processing, cooking and baking.

Middleby Residential targets the premium kitchen equipment market and offers a wide range of innovative, high-quality appliances for residential kitchens. Its products integrate advanced technology and design and target the premium segment of the market.

Some of Middleby Residential's brands include :

Power, silence and connectivity.

We are the secret ingredient in your kitchen. The silent power of our expertise is incorporated in everything we make. Our cooker hoods and hobs are extremely silent in use and the lighting minimalistic in design, created to bring peace to the heart of your kitchen. Powerful too, built with an eye for precision and perfection. And designed so that you can comfortably cook, thanks to smart technology that lets your kitchen appliances communicate. Power, silence and connectivity. And all this behind the scenes.

Novy, your kitchen's secret ingredient

POWER

Power is driven by passion. As pioneers, we use this unadulterated energy to push our boundaries further and further. This will to improve, to continue to refine, is for us the basis of everything we create. Every cooker hood, hob and designer lighting is the result of avant-garde technology and years of craftsmanship. Because pure power is what drives us. And that's no different for our appliances.

Novy, your kitchen's secret ingredient

The power you feel but don't see

Performance is always our first goal. The constant question "Can it be done differently and better?" has led to the development of numerous innovations. Whether it's peripheral extraction, adjustable-height extraction, or automatic power regulation – all Novy range hoods are designed to be quieter than cooking sounds, where efficiency and ease of use are just as important. To achieve this, we combine powerful, highly efficient motors in an optimized casing. Whether you choose a classic exhaust system or the energy-saving recirculation version – unpleasant odors are reliably, quietly, and quickly removed from the kitchen.

- High-quality materials and workmanship
- Integrated motor or remote motor
- Innovative extraction
- Multi-layer grease filter
- Extraction or recirculation

Craftsmanship with a soul

Our strength lies in solid and well-considered work. In extremely silent, but high-performance motors. In technology, driving to the limit. In wanting to excel. In commitment. But also in our hands.

For us, craftsmanship is the starting point for delivering quality. We share this knowledge and form the connecting factor between pure design, a well-considered choice of sustainable materials and perfect execution. Our thinking is reflected in every cooker hood and hob developed and produced in Belgium.

Because that finesse is what turns cooking into an art.

SILENCE

Silence is what you need to achieve perfection. That's why, at best, there's a whisper in the wings, and why the finishing touch is added to the board with the utmost precision. It's also why our cooker hoods, hobs and design lighting are remarkably discreet, shrouded in minimalism and visual tranquillity. We make it our mission to make appliances that are ultra-quiet, without disturbing noise. The result is a design that is pure - nothing but the essence - and a cooker hood that is always quieter than what you cook.

Novy, your kitchen's secret ingredient

We bring silence to your kitchen

We bring peace to your kitchen, so you can put passion in your cooking. We polish our designs to pure lines that combine subtlety with performance. Discreet, silent and strong in their abstraction. Because for us, every detail is a consideration, every choice made to give you freedom.

We understand the power of subtlety. That is why our designs are resolutely geared towards a calm interplay of lines and an eye for detail. Sophisticated design leads the way, combined with comfort in every action.

Strikingly inconspicuous

Our cooker hoods are designed to be quieter than what you are cooking. We've developed an advanced noise reduction system and a double-walled base plate: optimised aerodynamics that reduce resistance. Therefore: less noise, less distraction and also energy efficient.

- **Quiet motor**
- **Advanced silencing system**
- **Double-walled insulated base plate**
- **Ventilation tower with adjustable heights**
- **Recirculation or ducted to the outside**
- **Adjustable lighting**

Visual perfection

Our desire for perfection translates into appliances that blend in seamlessly with their surroundings. We extend this visual tranquillity into every detail to create the timeless elegance.

MODERN DESIGN

Novy Mineral Black

Stylish design effect

Trends come and go in the kitchen, but black will always remain. However, not all black is the same. Mineral Black, a matte black that stands out because of its subtle structure.

Low-maintenance

Besides the aesthetic element, there is also a practical advantage. Thanks to its structure, Mineral Black is very easy to maintain and less sensitive to fingerprints.

The following devices are available in Mineral Black :

- Novy Cloud
- Novy Pureline Pro (Compact)
- Novy Pureline Compact
- Novy Mini Pureline
- Novy Flatline wall-mounted and island
- Novy Pureline Frame
- Novy Phantom
- Novy Mood
- Exhaust boxes
- Designer lighting

CONNECT

Intuition is the guiding principle in the kitchen. Our smart technology is designed to let you cook comfortably and to follow your own intuition. By simplifying your life, we give you the freedom to create, to improvise. That's why we continue to refine our technology so that your cooking becomes an experience, a combination of elegance and delicacy. For us, it's all about connection: between people, but also between the cooker hood and hob. Because working together is simply stronger.

Novy, your kitchen's secret ingredient

Connect in a snap

Our smart features let you become one with your kitchen. Thanks to innovative technology, your pots and pans no longer boil over. Moreover, they always stay at the right temperature, even when you move them. And now you're even alerted when your filters need maintenance so you can continue to enjoy optimum performance. That's how Novy becomes the secret ingredient in your kitchen: a smart tool that makes cooking easier for you.

Intuitively operated

As a specialist, we've developed a new generation of cooker hoods and hobs. Efficient and designed with the desire to take your cooking to the next level. Above all, it's intuitive, so every command is at your fingertips. How do we make it happen? With the InTouch technology and the Novy Connect App.

The **InTouch technology** allows you to operate the cooker hood from your induction hob. All functions are at your fingertips: handy, simple and intuitive. Moreover, there is no need for extra cabling.

In the **Novy Connect App**, the communication between cooker hood, hob and yourself gets more depth. You can easily adjust the settings regarding extraction and lighting according to your own wishes and needs. Those settings can be saved so that your cooker hood can work in a completely personalised way. What's more, you are guided through the maintenance of the various filters.

Connectivity matters to us:
between people around the
cooking island, and between the
cooker hood and the hob.

Video
With Novy, you can enjoy the ultimate cooking
experience thanks to the Novy Connect technology.

Pure technology

Using technology to make your life easier, that's our goal. That's why we develop practical applications that immediately improve the quality of your cooking experience. Smart technology knows when you put a pot on the hob, and even when you move it.

Temperature settings ensure that the water does not boil over. This way, cooking becomes pure intuition, a mix of creativity and freedom.

Our recirculation systems are as durable as they are effective. They eliminate the strongest odours from your kitchen without extracting hot air to the outside. This allows you to recover heat and save energy. And it doesn't stop there, a hood with recirculation provides greater flexibility and is easier to install.

- **Intuitive operation**
- **Combined smart technology**
- **Convenient flex zones**
- **Pot Move function**
- **InTouch technology**
- **Pleasant indoor climate**

Cooker hood guidelines

The best extraction solution for your kitchen often depends on the architecture of the property you live in, and the style of cooker hood that suits you and your requirements. The following step-by-step plan will help you select the correct kitchen ventilation solution for you.

Step 1 How wide should your cooker hood be?

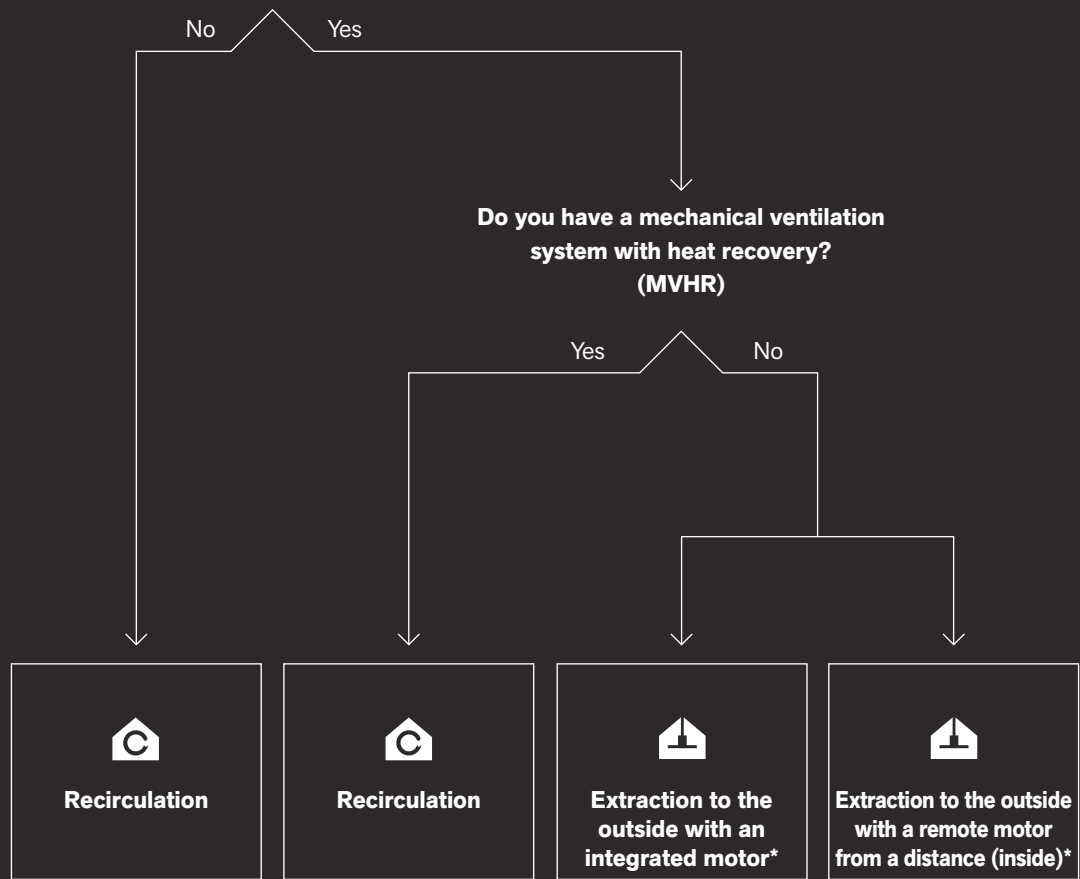

Cooking vapours do not rise straight up, but at an angle between 10 and 15 degrees. For proper operation, the cooker hood must be at least the full width of the hob. For an island arrangement, choose a wider model for efficient extraction. The maximum height of your cooker hood also plays a role. These can be found via the symbol  on the product pages.

Step 2 Extraction to the outside or recirculation?

The choice between extraction to the outside or recirculation depends on the architecture of your property, your wishes and possibilities. It has a major impact on the installation of the kitchen.

Is extraction to the outside (via the roof or facade) possible?

Extraction to the outside is the best solution, but recirculation is an option provided there is sufficient ventilation (to be provided by the customer).

A remote motor enables a limited built-in height for the Pureline and Mini Pureline.

* No outlet without an inlet

A cooker hood works optimally when the extracted air is replaced with fresh air. An insufficient air inlet leads to a loss of efficiency. It is therefore best to provide a sufficient air inlet (via a window extractor, an open door or window, or from another room).

Step 3

Where should
you place the
cooker hood?

How wide
is your hob?

COOKER HOOD NOVY

Silent power in the kitchen

The best cooker hood is one that does not attract unnecessary attention. Its inconspicuousness is what turns it into a small secret. Cleanly designed, quiet, and technologically advanced. Tranquillity itself.

- **Silent motor**
- **Extensive soundproofing**
- **Purified indoor air**

Progressive design

The ultimate package for the best results. That's the Novy cooker hood. Its high-performance technology ensures efficient extraction of cooking fumes and odours. The motor is also equipped with a sound-absorbing system and the finish is the highest quality. Most of all, the design is discreet and beautiful.

Smart functions

InTouch

Operate your cooker hood from your hob with wireless RF communication.

Variable lighting

Customise the lighting: vary between warm and cold tones and dim when you want. The soft on/off button gradually turns the light on or off.

A rule of thumb for a good ducting

Ducting is crucial for the functioning of a cooker hood with outward air extraction, and in some cases, with recirculation too. The key to optimum efficiency and silent operation is choosing the right materials.

Here are a few points to consider

Short and powerful

A cooker hood loses suction capacity with each additional metre of ducting. That is why you should keep the ducting as short as possible. Generally speaking, flat channel ducting should be no more than 13 metres long and have a diameter of 150 mm. In addition, each 90-degree bend in the ducting is equivalent to an extra 3 metres of ducting, and each 45-degree bend is equivalent to an extra 2 metres.

Example 1:

If a 90° bend and a 45° bend are used, the straight exhaust duct may be a maximum of 8 metres long ($13 - 3 - 2 = 8$)

Maximum 13 metres

90° bend: minus 3 metres

45° bend: minus 2 metres

Example 2 (Drawing see p. 31):

If two 90° bends are integrated into the exhaust duct, the straight duct may be max. 7 metres long ($13 - 3 - 3 = 7$)

Maximum 13 metres

90° bend: minus 3 metres

90° bend: minus 3 metres

The perfect diameter

The ducting should have the same diameter as the connection on the cooker hood. You should limit the use and length of flexible ducting hoses as far as possible and extend hoses as far as possible. (1)

Absolutely airtight

Tape or a hose clamp are the perfect tools for making ducting completely airtight. (2)

Good air conduction

Corners or bends in ducting impact the conduction of air. Rounded bends promote good air conduction whereas squared-off bends have the opposite effect. (3)

An external wall grille is essential

An external grille that allows sufficient air to pass through promotes optimum air conduction. It also means the cooker hood is silent and efficient. (4)

Ensure an adequate supply of air

Whether the kitchen is compact or spacious, the quantity of air extracted can never be greater than the quantity of air supplied. In other words, if you do not have an adequate supply of air, the cooker hood will work less efficiently even when it is recirculating air.

Pure kitchen air

Our **Novy Pure 3.0** technology ensures a pleasant indoor climate. You can count on effective recirculation that keeps even the strongest odours out of your kitchen, without unnecessarily extracting warm, purified air to the outside.

Easy maintenance

Under normal cooking conditions, the carbon filter must be replaced after 3-5 years or 450/900 hours of cooking (depending on the models). This makes the replacement cost minimal compared to other systems.

1

Cooking vapours are immediately extracted thanks to the **high-performing, silent motor**.

2

The efficient **multilayer grease filter** captures all the grease particles that are released during cooking.

3

The carbon particles in the **monoblock filter** have a natural coating, exclusively made by Novy. This neutralises the strongest odours - even fish - from 95% up to 100%.

4

The **closed, sound-absorbing airflow system** accompanies the hot cooking fumes and prevents moisture from accumulating in the ceiling or cabinet.

5

The purified hot air is reintroduced into the kitchen, which guarantees **perfect recirculation** and heat recovery.

NOVY DOWNDRAFT EXTRACTION

Opting for freedom of movement

Space in the kitchen is a luxury. Imagine that you can make optimum use of every surface, without disturbing visual elements. Our worktop extraction system rises to capture fumes immediately at the source, and is concealed back within the surface after use. For those who appreciate both refinement and efficiency.

- Extraction at the source with adjustable heights
- Recirculation or ducted to the outside
- Visually incorporated

Specialised ventilation tower

The most effective way to capture odours and fumes is to catch them directly as they arise. A ventilation tower with an adjustable height is our advanced solution, so that cooking vapours are extracted at source – directly next to the pans.

Recirculation or extraction to the outside

There are two options for extracting fumes and odours: a traditional outlet ducted to the outside or recirculation of the purified air.

The latter option is ideal for energy-efficient homes, or in kitchens where it is not possible to extract the air outside. The built-in recirculation box is equipped with a monoblock filter. This slows down the airflow, which ensures the maximum time for unpleasant odours to be absorbed.

NOVY

PREMIUM
INNOVATION
PRODUCT

Novy Panorama 90

- Direct extraction at source, thanks to the adjustable height: 10, 20 and 30 cm. The height can be adjusted during cooking
- Height of the tower can be freely adjusted via the Novy Connect app or the control on the hob
- Preset extraction function
- Semi-transparent extraction tower disappears invisibly into the hob
- 3 or 4 cooking zones + bridging functions
- Unique and elegant design
- Easy to maintain
- Surface and flush installation possible
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

NOVY

PREMIUM
INNOVATION
PRODUCT

Novy Panorama 120

- Direct extraction at source, thanks to the adjustable height: 10, 20 and 30 cm. The height can be adjusted during cooking
- Height of the tower can be freely adjusted via the Novy Connect app or the control on the hob
- Preset extraction function
- Semi-transparent extraction tower disappears invisibly into the hob
- 4 or 5 cooking zones + bridging functions
- Unique and elegant design
- Easy to maintain
- Surface and flush installation possible
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Novy Panorama 120 / Venting hobs

44 – 45

42120

Tower exhaust system
Optimal extraction at the height of the pots.

Flexzone
Automatic or manual bridge function of 2 cooking zones.

Recirculation
Recirculation is optional.

Novy Connect
Operation and settings possible via smartphone or tablet.

Novy Up

- Direct extraction of cooking vapours thanks to the adjustable flap and central extraction tower
- Manual operation of the extraction tower
- Adjustable flap with adjustable height for directional extraction
- Extraction tower disappears in between the domino hobs
- Choice of various cooking setups
- Surface and flush installation possible
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Tower exhaust systeem
Optimal extraction at the height of the pots.

Flexzone
Manual bridge function of 2 cooking zones. (except 40002)

Recirculation
Recirculation is optional.

p. 120

Step-by-step plan

The following 5-step plan helps you find your way in choosing the right Novy ceiling unit.

Step 1 Width of the ceiling unit

For a good result the cooker hood must be at least the full width of the hob. Our ceiling units are available in sizes 90, 110, 120 and 150 cm. The following combinations are recommended for the ceiling units (directive):

Width hob	Width ceiling unit	Max. distance between cooker hood and hob
≤ 80 cm ¹	min. 90 cm	160 cm
81 - 109 cm	min. 110 cm	160 cm
110 - 120 cm	min. 120 cm	160 cm
> 120 cm	min. 150 cm	160 cm

¹ For installation in fully suspended ceilings, we recommend a ceiling unit of at least 120 cm for hobs 80 and 90 cm wide.

Step 2 LED lighting

With LED lights

The ceiling unit is equipped with dual LED lighting or a LED strip. The light intensity and colour temperature can be adjusted to your wishes.

Without LED lights

For a minimalistic design. To these ceiling units you can connect external lighting (max. 300 W), which can be operated through the cooker hood, remote control or InTouch technology (not dimmable).

Step 3 Recirculation or exhaust to the outside

Recirculation

If extraction to the outside is not an option, you can choose recirculation instead. For ceiling units it is possible to choose

- 2 types of built-in boxes, each in 3 colours with monoblock filter.
- A basic kit. The basic kit contains a monoblock filter. The monoblock filter is placed directly behind the grease filter. The exhaust grill to let the filtered air back into the kitchen must be provided by you.

The Novy Cloud has recirculation as a standard.

With a cooker hood with recirculation, there must be a minimum of ventilation in the room where the cooker hood has been installed. Ventilation can be provided by the overall ventilation in the house or by opening a window and/or door.

Duct out

Novy offers a wide range of installation accessories on p. 230.

A cooker hood works optimally when the extracted air is replaced with fresh air. An insufficient air inlet leads to a loss of efficiency. It is therefore best to provide a sufficient air inlet (via a window extractor, an open door or window, or from another room).

Step 4 Ceiling unit installation options

The Novy Pureline ceiling unit can be installed in 2 ways:

- flush-mounted in the ceiling
- in an alcove or a self-constructed chimney

The Novy Cloud ceiling unit can be mounted directly to the ceiling.

The maximum installation height (between the hob and the underside of the ceiling unit) is 160 cm.

Installation in an alcove or self-constructed chimney

Cooking vapours do not rise straight up, instead they fan out over an angle of between 10° and 15°. For an efficient operation it is important that the whole construction in which the ceiling unit is installed is at least the same width and depth as the hob. Create an overlap of approximately 30 cm around the ceiling unit to prevent cooking vapours from escaping. In addition, edging of 5 to 10 cm high will ensure that fewer vapours can escape.

Installation in the ceiling

In this type of installation the ceiling unit is installed in a suspended ceiling and usually covers the entire kitchen. Because the unit is flush with the ceiling, vapours cannot rise higher than the unit itself and are captured along the edges.

Mounting onto the ceiling

The Novy Cloud ceiling unit only needs to be screwed to the ceiling and does not require any opening in the ceiling. Never before has it been this easy to install a cooker hood. Make sure, however, that your ceiling is sufficiently strong.

Construction of the suspension structure

On the long sides of the Pureline ceiling unit there are mounting clamps that hold the cooker hood in the cut-out opening. For this, the material and thickness must be 18-35 mm.

Never mount directly in the plasterboard, always provide reinforcement (in wood, on the side or by means of a frame) to which the mounting clamps can be clamped.

Adapter for flat duct with limited built-in height

If the built-in depth is limited, it is possible to remove the Cubic motor from the ceiling unit. In this situation, an optional adapter can be ordered. The adaptor is placed directly on the ceiling unit and connected to a flat rectangular duct. The motor is then installed in a different location indoors. Please note that the entrance to the motor is round. With adapter 6830.053 the built-in height can be limited to 17,3 cm and with 830.053 to 18,5 cm. Always mount the adapter 6830.053 and 6930.050 in combination with the kit to install remote motor inside (800.991).

6830.053	Adaptor for Pureline. exhaust direction can be turned to the right, left, front or rear
6930.050	Adapter for Pureline Pro. exhaust direction can be turned to the right, left, front or rear
830.053	Adaptor for Maxi Pureline (order 2x). Exhaust direction 1x left and 1x right
800.991	Kit to install the remote motor inside (Pureline Pro & Pureline)

Step 5

Type of motor

Cloud ceiling unit recirculation as standard

This ceiling unit is equipped with recirculation as standard and needs only to be screwed to the ceiling. It is not necessary create an opening in the ceiling.

Ceiling unit motor not included

Models without a motor are combined with an interior motor, wall-mounted motor or flat roof motor

Ceiling unit with compact motor

The ceiling unit, including the compact motor, has a built-in height of only 19.5 cm. The exhaust can be turned to the right, left, front or rear. This motor cannot be removed.

Ceiling unit with a Cubic motor

The integrated Cubic motor offers the necessary flexibility, because the exhaust can be rotated in all directions (right, left, front, rear or above).
With an optional kit (800.991), the Cubic motor can also be removed and placed elsewhere in the house. A 5 m cable (included) connects the ceiling unit with the motor.
If required, this cable can also be extended (optional). This extension cable is connected to the existing cable and has a length of 5 m.

Technical drawings

The drawing shows the unit's dimensions: width 1100mm, depth 600mm, and height 176mm. It also shows the distance from the wall to the unit (≥50mm) and the distance from the unit to the wall when an air guide is used (≥100mm). The unit is shown with its front panel and the internal components, including the motor and filters. The unit is labeled with R50 and R31.

The minimum distance from the left and/or right side of the Cloud to a wall or window may not be less than 50 cm.

Use the supplied air guide if the distance between the left and/or right side of the cooker hood and a wall or window is 50 to 100 cm. At the front of the cooker hood, where the air is blown out, the distance to the wall must then be at least 100 cm.

Novy Pureline Pro Compact

- A built-in height of only 19.5 cm thanks to a compact motor
- Flexible installation possibilities due to rotating motor in several directions (left, right, front or rear)
- Maximum efficiency yet extremely quiet
- LED lighting warm white (2,700 K) adjustable to neutral white (5,000 K)
- Ultra slim led strip with extensive lighting function for the right amount of light and atmosphere during and after cooking (cooking mode and ambient mode)
- Automatic speed control with the Novy Sense sensor for detection of cooking vapours and odour (optional)
- Operation and settings possible via smartphone or tablet (Novy Connect), as well as via remote control
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Novy Connect

Novy Pureline Compact

- A built-in height of only 19.5 cm thanks to a compact motor
- Flexible installation possibilities due to rotating motor in several directions (left, right, front or rear)
- Maximum efficiency yet extremely quiet
- LED lighting warm white (2,700 K) adjustable to neutral white (4,000 K)
- Integrated dimmable LED lighting
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Novy Pureline Pro

- Maximum efficiency yet extremely quiet
- LED lighting warm white (2,700 K) adjustable to neutral white (5,000 K)
- Ultra slim led strip with extensive lighting function for the right amount of light and atmosphere during and after cooking (cooking mode and ambient mode)
- Automatic speed control with the Novy Sense sensor for detection of cooking vapours and odour (optional)
- With a Cubic motor; which can be rotated in all directions and with optional kit removable for indoor installation
- Operation and settings possible via smartphone or tablet (Novy Connect), as well via remote control
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Novy Connect
Operation and settings possible via smartphone or tablet.

Novy Pureline with lighting

- Maximum efficiency yet extremely quiet
- LED lighting warm white (2,700 K) adjustable to neutral white (4,000 K)
- Integrated dimmable LED lighting
- Flexible installation thanks to models:
 - With a Cubic motor; which can be rotated in all directions and with optional kit removable for indoor installation
 - Without a motor; for use with an external motor
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Novy Pureline without lighting

- Maximum efficiency yet extremely quiet
- Flexible installation thanks to models:
 - With a Cubic motor; which can be rotated in all directions and with optional kit removable for indoor installation
 - Without a motor; for use with an external motor
- No lighting, to suit your own lighting plan
- External lighting can be connected through the cooker hood and controlled via the cooker hood and/or remote control
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Novy Canopy Essence

- Built-in units in stainless steel for a decorative chimney or canopy
- Suitable for compact kitchen setup
- Convenience and easy control
- Sleek design filter for the optimum extraction of cooking vapours
- LED lighting (2,700 K)

Distance
Maximum distance between cooker hood and hob.

Recirculation
Recirculation is optional.

Seamless integration into shallow wall cabinet

Discover all assets

Novy Fusion Pro meets the demand for designer cooker hoods in shallow wall cabinets. With this highly developed concept, Fusion Pro, like Fusion, is concealed and integrated into a shallow wall cabinet. Discover all the advantages.

Transparent tilting panel to catch cooking fumes

Invisible in closed position

Tailored design exhaust grill for upper cabinets in case of recirculation

Seamless finishing to protect the wall cabinet

Convenient storage space

Chimney extension available in white and anthracite

NOVY

PREMIUM
INNOVATION
PRODUCT

Novy Fusion Pro

- Can be invisibly integrated into a wall cabinet with minimum and maximum depth of between 300-360 mm
- Tilting cover in transparent glass for optimum capture of cooking vapours
- Completely invisible in closed position
- LED strip (3,000 K), dimmable
- Sufficient space for storage
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Novy Fusion Pro / Telescopic cooker hoods

148 – 149

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

In option

Novy Telescopic Essence

- Can be integrated flush with the wall cabinet
- Telescopic slide for optimum capture of cooking vapours
- Sleek design filter for the optimum extraction of cooking vapours
- To be attached to intermediate shelf
- LED lighting (2,700 K)

Distance
Maximum distance between cooker hood and hob.

Recirculation
Recirculation is optional.

Technical drawings

a) With chimney extension
(1) This model should be connected to an internal motor type 245.999, a wall motor type 445.999 or roof motor type 745.999 of 755.999 (see accessories).
The air volume/noise level depends on the type of motor and installation.

Electrical connection

With exhaust to the outside

- Option 1
- The cooker hood is mounted with a chimney and the air outlet is upwards.
 - The mains socket is placed behind the chimney.
- Option 2
- The cooker hood is mounted without a chimney and the air outlet is to the rear.
 - The mains socket is placed directly above the cooker hood (minimum distance 30mm).

Recirculation

- Electrical connection of the cooker hood
- The mains socket is placed directly above the cooker hood (minimum distance 30mm).

a) With chimney extension

Novy Flatline

- Extra slim lines
- Seamless finish
- Subtle looking LED lighting (2,700 K)
- Reversible chimney for recirculation as standard
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

PRODUCT

Novy Phantom Frame & Novy Phantom Cable / Island cooker hoods

194 – 195

Novy Phantom Frame & Novy Phantom Cable

- Light translucent glass for an eye-catcher in the kitchen
- Novy Phantom Frame has a subtle frame for an industrial look
- Novy Phantom Cable has a height-adjustable steel cable for a floating effect
- Four corner spotlights bring the box-in-box design to life (2,700 K)
- Dimmable LED strip creates ambient upward scattered light (2,700 K)
- Functional dimmable cooking light - colour intensity can be selected (2,700 K to 4,000 K)
- Integrated recirculation solution for optimal energy efficiency (carbon filter with a life span of up to 900 cooking hours)
- Operation possible via Novy Connect App, as well as via remote control

Distance
Maximum distance
between cooker hood
and hob.

InTouch
Standard with function
for controlling the cooker
hood from the hob.

Recirculation
Standard with recirculation.

Novy Connect
Operation and settings
possible via smartphone
or tablet.

PREMIUM
INNOVATION
PRODUCT

Novy Pureline Frame

- Width and arrangement can be adapted to individual needs thanks to modular construction
- Sheet material is an important part of the kitchen, therefore it is not included in the delivery, but provided by your professional kitchen fitter
- Optimum efficiency even with wide cooking surfaces (fume hood range B 90/120cm and D 50cm)
- Dimmable LED illumination warm white (2,700 K), adjustable to neutral white (4,000 K) for illumination of worktop
- Integrated recirculation solution for optimal energy efficiency (carbon filter with a life span of up to 900 cooking hours)

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Standard with recirculation.

PRODUCT

Novy Mood

- Efficient cooker hood and lighting in one
- Adjustable light intensity and colour temperature from 2,700 K to 5,000 K
- Recirculation as standard for additional planning options (carbon filter with a life span of up to 900 cooking hours)
- Extended lighting function for the right amount of light and atmosphere during and after cooking (cooking mode and mood mode)
- Operation and settings possible via smartphone or tablet (Novy Connect), as well as via remote control

Novy Mood / Island cooker hoods 208 – 209

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Standard with recirculation.

Novy Connect
Operation and settings possible via smartphone or tablet.

Novy Flatline

- Extra slim lines
- Seamless finish
- Subtle looking LED lighting (2,700 K)
- Reversible chimney for recirculation as standard
- Recirculation optional: carbon filter with a life span of up to 900 cooking hours

Distance
Maximum distance between cooker hood and hob.

InTouch
Standard with function for controlling the cooker hood from the hob.

Recirculation
Recirculation is optional.

Recirculation

By opting for recirculation you no longer need to vent warm air to the outside, which saves you energy. In addition, a cooker hood with recirculation offers more freedom with regard to its position in comparison to a cooker hood with an exhaust to the outside. This technology is based on an upgraded monoblock carbon filter that provides an extraordinary level of cooking odour absorption.

Installation methods

Novy built-in box with monoblock filter for ceiling units, downdrafts and canopy

The Novy built-in box with monoblock filter must be built into an existing structure, cabinet or plinth, and is connected to the cooker hood. The odours of the extracted cooking vapours are filtered out by the monoblock filter in the box. It also reduces the noise more. The air is then returned to the kitchen through the exhaust grill of the box. This excellent efficiency is due to the elegant design of the box, in which small hexagonal holes ensure a greater air flow. Visually, the smooth surface results in a subtle integration into the plinth.

Basic kits to integrate in ceiling units and canopies

For ceiling units and canopies a kit can be ordered when opting for recirculation. The basic kit consists of a monoblock filter. This is placed directly behind the grease filter. For the Novy Fusion Pro, Fusion, Telescopic and Telescopic Essence a tailored design exhaust grill for upper cabinets (906.450) is available to optimise the return of filtered air into the kitchen. Minimum space required between the upper cabinet and the ceiling: 20 cm
For ceiling units and other canopies a exhaust grill to return the filtered air into the kitchen must be provided by you.

Basic kits for wall and island cooker hoods

For wall and island cooker hoods you must order a basic kit when opting for recirculation. This basic kit with monoblock filter is integrated in the chimney of the cooker hood. It also reduces the noise more. The air is then returned to the kitchen through the outlets in the cooker hood chimney.

Cooker hoods with recirculation as standard

Some cooker hoods are equipped with recirculation and a monoblock filter as standard.

Replaceable carbon filter cartridges

Novy Salsa and Essence cooker hoods use replaceable carbon filter cartridges. In due course the cartridges must be replaced. The kit consists of a cartridge filled with active carbon granules. The exhaust grill must be provided by the customer in the canopy, decorative chimney or cabinet (except in the case of Salsa).

Maintenance

Replacement monoblock filter or active carbon filter cassettes

After 3 to 5 years (depending the models and on the intensity of cooking) the monoblock filter needs to be replaced. All cooker hoods have a cleaning indicator which, in the case of a monoblock filter, lights up after 900 hours of cooking (depending on the models). In the case of cooker hoods with active carbon filter cartridges, the indicator lights up after 120 hours and the cassette must be replaced.

Novy offers a wide range of accessories that make it possible to adapt a cooker hood to your specific situation. In this way it will be a great pleasure to use your cooker hood.

Motors

Remote motors

For models without an integrated motor, you have the option of a remote motor. The choice is between installation indoors and various motors for outside installation. This enables you to install a cooker hood in a suspended ceiling with limited height and create absolute silence in the kitchen. When installing a remote motor the sound level depends on the type of motor and installation. If the Novy cooker hood is installed without a Novy motor (or the motor without a Novy cooker hood) the warranty becomes void.

The cooker hood contains as standard a connection cable of approx. 4 m (depending on the model). A 5 m extension cable is optionally available if the distance between the cooker hood and the motor is greater.

Kit to install remote motors inside

For the models Novy Pureline Pro, Pureline and Mini Pureline the motor can be easily installed remotely inside with an additional installation kit.

This installation kit contains a 5 m connecting cable as standard.

An optional 5 m extension cable is available if the distance between the cooker hood and the motor is greater.

Maintenance

Grease filters

To ensure optimum filtering of grease it is necessary to regularly (1 x per month) clean the grease filter. The integrated cleaning indicator in almost all cooker hoods is a reminder and illuminates after 20 cooking hours. The grease filter can be cleaned in the dishwasher. However, we recommend replacing the filter after 5 years. To find the correct grease filter for your cooker hood please consult the technical table at the end.

Stainless steel cleaner

For optimum cleaning of your stainless steel cooker hood we recommend you use Novy stainless steel cleaner. This is a soft nourishing mousse that leaves no traces leaving a clean surface.

906.060	Stainless steel cleaner
---------	-------------------------

Installation accessories

InTouch

InTouch offers the possibility to operate the Novy cooker hood from the Novy InTouch induction hob.

Practically all cooker hoods with electronic control can be operated as standard or with an optional InTouch kit to be combined with Novy InTouch induction hobs.

Novy Cloud, Pureline (Pro) (Compact), Maxi Pureline, Mini Pureline, Crystal, Fusion Pro, Fusion, Flatline, Phantom, Pureline Frame and Mood are standard equipped with the InTouch function.

For the Novy telescopic cooker hood (663/693) and Vision an optional InTouch kit (incl. remote control) is available.

990.021	Kit for InTouch (incl. remote control)
---------	--

Remote control

Novy Cloud, Pureline (Pro) (Compact), Maxi Pureline, Mini Pureline, Phantom, Pureline Frame and Mood are equipped with a remote control as standard.

The Novy Cloud, Pureline Pro (Compact) and Mood can also be controlled via the Novy Connect application.

Optionally, the Novy Crystal, Fusion Pro, Fusion, Flatline can be equipped with a remote control.

840.029	Remote control (white)
840.049	Remote control (black)

LED lighting kit

For a number of models you can replace the existing LED lighting of 2,700 K (warm white) by LED lighting of 4,000 K (neutral white).

Novy Pureline (Compact) and Mini Pureline are equipped with dual LED lighting for which the colour temperature can be changed manually, before installation, from 2,700 K (warm white) to 4,000 K (neutral white).

Control kit for external lighting or remote covers

Would you like to connect additional ambient lighting to your cooker hood? Or do you need to control a remote cover the moment the cooker hood is switched on? With the kit 990.030 you can control both. The kit can be used on Novy Pureline (Compact), Mini Pureline, Crystal, telescopic (663/693) and Flatline.

Novy Maxi Pureline, Pureline: 6833, 6834, 6838, 6839, 6843, 6844, 6848, 6849 are equipped as standard with a connector which makes it possible to switch on external lighting (max. 300 W).

Extension chimneys for wall and island hoods

If the standard lower chimney is too short, you can always opt for a extension chimney. When ordering an extension the lower chimney is included to avoid colour differences.

Input / output module

The potential-free input relay can be used to connect, for example, a window switch. This ensures that the extractor hood only switches on when a window or additional supply air valve is activated.

The output is a potential-free relay and therefore does not provide a direct output power. It is therefore possible to use it to control an external ambient lighting (not possible for the Novy Pureline Pro or Pureline Pro Compact) or electric valve with external power supply from the moment the extractor hood is activated.

Module 990.036 is suitable for Novy Panorama 90, Panorama 120, Pureline Pro and Pureline Pro Compact.

Adapter for limited installation height in ceiling, canopy, decorative chimney or cabinet

If the installation depth is limited, it is possible to dismount the Cubic motor from the Novy Pureline, Pureline Pro, Maxi Pureline and Mini Pureline. In this situation, an optional adapter can be ordered. The adapter is placed directly on the ceiling unit or recessed unit and connected to a flat rectangular duct. The motor is then mounted at a different location indoors. Please note that the input of the motor has a round connection. Always mount the adapter in combination with the remote motor kit.

To simplify the installation, it is recommended to use the flexible flat exhaust duct (906.408) for the last part between flat duct and extractor.

Novy Sense Sensor: Automatic speed regulation

The Novy Sense sensor offers both manual and automatic speed regulation for the Novy Pureline Pro and Pureline Pro Compact. In automatic mode, the sensor detects the intensity of cooking vapors (based on moisture and pollution) and odors and adjusts the motor speed to the optimal level. The air quality in the kitchen can be checked at any time via the Novy Connect app.

This sensor is optional and must be installed before the appliance is mounted to ensure optimal performance and convenience.

Installation accessories

The proper functioning of a cooker hood is partly determined by the correct installation of the device and it is important that you take this into consideration at an early stage of the construction process. Novy offers a wide range of installation accessories for your specific situation.

Flat exhaust ducts

These ducts are very suitable for ceilings with a small overall height.

Ø 125 mm
906.301
Ø 150 mm

Wall exhaust valve

This valve covers the exhaust duct. It keeps cold air out, but also other weather and natural influences, so that the exhaust does not get blocked.

Wall exhaust valve
906.078
173×173 mm, aluminium
for exhaust Ø 125 mm
906.178
210×210 mm, aluminium
for exhaust Ø 150 mm
906.400
210×210 mm, black (RAL9005)
for exhaust Ø 150 mm
906.079
246×246 mm, aluminium
for exhaust Ø 200 mm

Wall conduct kit for

Wall conduct kit with telescopic
pipe including built-in heat retention
non-return valve and stainless
steel grill for ground-level and
conventional installation at ceiling
height.

Wall conduct kit for ducting
906.420
Ø 150 mm

Wall conduct kit for flat exhaust duct
906.425
89×222 mm

Exhaust grill for upper cabinet

Tailored design exhaust grill for
upper cabinets to optimise the
return of filtered air into the kitchen.

906.450
Connection diameter Ø 150 mm,
Cut-out in housing Ø 170 mm

NOVY HOBS

Control at your fingertips

You can cook intuitively. The cooker hood can also be controlled from the hob. InTouch technology combines cooker hood and induction hob into one, without the need for remote control. Wireless, and seamless.

- InTouch connection with cooker hood
- Flexible cooking zones
- Automatic pot detection

Installation method

Have your induction hob placed on top of the worktop (surface-mounted) or opt for recessed integration (flush-mounted) and go completely seamless.

Intuitive operation

All our hobs can be operated intuitively. Thanks to the slider and touch control function, every temperature change is at your fingertips.

Minimalist design

A sleek design stripped of all frills - you'll recognise this in every Novy hob. Even the controls remain in the background and only light up when you start cooking.

Convenient flex zones

Connect two cooking zones into one large cooking zone. Convenient if you have large pots and pans on the hob, or if you want to grill like on the barbecue.

Pot move function

Move your pot or pan to a new zone without losing the programming of the current zone.

Pro with the Chef

The Chef function automatically pairs the flex zones into 2 or 3 cooking zones (depending on the hob type) and divides them into different programmes. Choose between quick power cooking, simmering or keep warm.

InTouch technology

Operate your cooker hood from your hob with wireless RF communication.

- Even more flexibility and cooking surface through the use of octagonal zones
- Professional cooking programs, such as Pot Move and Grill function for even more functionality
- White slider touch control operation
- Maximum power of 3,700 W for the octagonal zones and 5,000 W for the round zone
- Surface and flush installation possible

Function
Function for controlling
the cooker hood from
the hob.

Flexzone
Automatic or manual
bridge function of 2
cooking zones.

Keep-warm function to keep food at a constant temperature.

Chef function for activation of programmed zones.

Video
Five reasons for choosing
a Novy induction hob

Induction Power

- Great flexibility due to the combination of octagonal and round zones
- Extensive cooking programs for refined cooking
- Red slider touch control operation
- Maximum power of 3,000 W per zone
- Surface and flush installation possible

InTouch
Function for controlling the cooker hood from the hob.

Flexzone
Automatic or manual bridge function of 2 cooking zones.

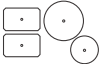

Keep-warm function
Keep-warm function to keep food at a constant temperature.

PRODUCT

Gas Pro

- Gas burners are directly integrated in your worktop (gas burners not compatible with wooden worktops)
- Robust, cast iron pot carriers in stylish and timeless look
- Visual control of the flame
- Sufficient space between the burners for large pots and pans
- Choice of various cooking setups

Model	Width (cm)	Number of zones	Max output (W)	Ref.
Altar Top black	30	1	3.000	56002
Azuma Top black	30	1	5.000	56004
Capital Top black	60	3	2.000, 3.000, 5.000	56006
Cusin Top black	90	3	3.000, 2× 5.000	56008
Dempo Top black	90	4	2.000, 3.000, 2× 5.000	56010
Danau Top black	120	4	2.000, 3.000, 2× 5.000	56012
Drum Top black	120	4	2.000, 3.000, 2× 5.000	56014
Elbrus Top black	90	5	2× 2.000, 2× 3.000, 5.000	56016

Do not use pans with a larger base diameter than the pan support. We recommend for the 2 and 3KW burners a pan with a maximum base diameter of 230 mm and for the 5KW burner a maximum base of 270 mm.

PREMIUM
INNOVATION
PRODUCT

Novy Shelf Pro

- The Novy Shelf Pro allows to adjust the width of the light beam over its full length
- A stylish shelf with integrated gesture-controlled (Pro) LED light
- Ideal in a kitchen without upper cabinets
- Top and bottom lighting
- Easy to swith between functional light and ambient light
- Adjustable light intensity and colour temperature from 2,700 K to 4,000 K
- Option to set ambient colour
- Available in Mineral Black and Mineral White

Novy Shelf Pro / Designer lighting

Premium Innovation Products

Novy's dedication to innovation has led to a new generation of products. Technologically sophisticated, they set the tone in relation to aesthetics, ease of use, simplicity and, of course, silence.

Due to their innovative and progressive features, these products are known as Novy Premium Innovation Products. This catalogue presents: Novy Panorama, Easy, Cloud, Pureline Pro (Compact), Fusion Pro, Phantom, Pureline Frame, Mood, Gas Pro, induction hobs 1775 and 1768 and Novy Pendant, Wall, Shelf and Shelf Pro. You can recognise these products from the **Premium Innovation logo**.

Novy Premium Partners

To support these products, Novy has decided to collaborate with **a selection of partners**. They receive extensive training and can offer you the expertise and advice you need to make the right choices. This is how Novy and its Premium Partners guarantee maximum comfort for your dream kitchen.

Cooker hood icons

	Ecosmart Extra quiet, super-efficient, longlasting and energy friendly products.		Design filter A filter with a modern and elegant design.
	Cooker hoods with a motor (direct extraction) The most common model is a cooker hood with an exhaust to the outside.		Perimeter extraction Placing a base plate under the cooker hood concentrates the extraction around the edges. This small gap speeds up the extraction. The smaller the area, the faster the airflow. This acceleration enhances the efficiency of the extraction system.
	Remote control These models come with a remote control, the other cooker hoods can also be fitted with them, by ordering an extra kit.		
	InTouch InTouch allows you to control your Novy cooker hood from your Novy induction hob.		Click&Fix A simple construction using a click system whereby the cooker hood can be clicked into place, after which only 4 screws need to be tightened.
	Installation height The installation height is the distance between the hob and the cooker hood. This height is extremely important for the optimum operation of the cooker hood. The advised installation heights are shown for each model.		Cubic Motor A square motor housing which can be installed remotely. The housing can be turned in any direction so that the exhaust direction can be chosen depending on the situation. This motor is designed for inside use.
	Tower exhaust system Optimal extraction at the height of the pots.		Recirculation Sometimes a cooker hood with an external exhaust isn't possible for technical reasons or isn't permitted. A recirculation cooker hood is one which returns the filtered cooking fumes back into the room. The grease in the fumes is filtered by the grease filter and the odours are absorbed by a filter with activated carbon (a monoblock filter). Damp air is not eliminated in the filter, but can be removed by the room's ventilation system. Most cooker hoods can be fitted with a recirculation accessory.
	Tower exhaust system Optimal extraction at the height of the pots, extraction on both sides of the tower.		
	Integrated extraction Powerful extraction by intergrated cooker hood.		
	Automatic speed control The Novy Sense sensor provides automatic speed control when cooking fumes and odour are detected.		
	Novy Connect Thanks to the Novy Connect App you can control your Novy device via your smartphone or tablet. With the Novy Connect App you can not only record your preferences, but also consult information and indication for the maintenance of your grease and/or carbon filter.		Ambient light In addition to the functional light that is provided on all cooker hoods (with the exception of Maxi Pureline and Pureline without lighting), extra ambient light is also provided on the following models: Mood, Cloud, Phantom, Pureline Pro (Compact). This light is dimmable and the colour temperature can be adjusted to the atmosphere you desire (with the exception of Phantom).

Hob icons

	Chef function  The cream of the crop is the Chef function, allowing you to link the Bridge zones automatically at the push of a button. The right-hand zone in setting 9 is for intensive cooking or baking. The centre zone in setting 6 is for simmering and the left-hand zone in setting 4 is to keep dishes warm.		Grill function  When using this function the Flexzone function is automatically activated to create a larger cooking surface. This function allows you to grill in the most ideal conditions. See Induction Pro and Power.
	Power and Super Power  Each zone has its own Power function, which boosts power considerably. This function is ideal for f.e. boiling large quantities of water.		Pot Move function  By engaging the Pot Move function in the Pro range, you can move pots and pans to another zone, while the settings are automatically maintained.
	Keep warm function  The keep warm function makes it very easy to maintain a constant temperature of 70°C (or 94°C on specific models).		Timer and independent cooking timer  Each zone has a separate timer and the hob is also fitted with an independent cooking timer.
	Stop & Go  Stop & Go can make sure that the power supply can be temporarily switched off. If you touch this control within 10 minutes, all the previously set levels are reinstated.		Count-up timer In the Pro range, each zone has a separate count-up timer which starts counting when a zone is switched on. It serves as an additional reminder whenever you choose not to set a timer yourself.
	Flexzone  The bridge function allows you to link two adjoining zones so that you can control them in one movement. Very handy for large pots and pans.		Automatic boiling function The contents of the pan are first brought to the boil for a set time and then the cooking process continues at a set lower level.

	Black opaque glass The glass lets no light pass through, which results in an even black cooking surface without being able to see inside the device.		Wipe Guard Lock your controls with Wipe Guard, so that the hob can be cleaned easily.
	Touch Control All induction hobs are simple and discreet to operate. Most of the hobs have a combination of Touch Control and slider control.		Slider control With the slider control you only need to slide your finger over the control to achieve the desired level. The level can also be directly selected.
	Cooking zone layout Cooking zone layout, zones of different power and sizes.		Safe When the pan is removed only the contact heat of the pan remains. The residual heat cools down very quickly. If a zone is accidentally turned on but there is no pan on the zone, nothing happens. The hob is also equipped with additional safety features: <ul style="list-style-type: none">- residual heat indicator- overheating safety- boil over safety- safety shut-off (when the device is left on for a long time)- child lock
	Cooking zone layout Cooking zone layout, where there are 2 octagonal zones on the left side for more flexibility and 2 powerfull round		
	Cooking zone layout Cooking zone layout, with octagonal zones for maximum flexibility and cooking area.		

Lighting

	Gesture Control  Our lights with Gesture Control (GC) are fitted with a single sensor. The location of the sensor is indicated with an icon in the centre of the fitting. You can switch the light on and off, dim it or adjust the atmosphere by changing the direction of the light (upwards or downwards) using a simple gesture under the sensor. You can also change the colour when the light is in ambient mode.		Ambient light In addition to the functional light, extra ambient light is also provided. This ambient light is dimmable and the colour temperature can be adjusted to the atmosphere you desire.
	Gesture Control Pro  The light objects equipped with Gesture Control Pro have smart sensors fitted along the length of the Shelf to enable you to alter the width and position of the light beam in addition to all of the features of the standard Gesture Control (GC). What if you don't want the light to shine along the entire length of the lamp but only where you are drinking your wine, working or reading your newspaper? Simply drag the light beam with your hand to where you want it.
